

Russellville Elementary 3rd grade Math - veronica.beucler@elsd.us

These are online items that the students will work on due to our extended time off from school. I am also sending home packets in case you don't have internet access. You have the choice to do the online activities or the packets, but your student **DOES NOT** do both. There are 10 different packets to choose from and they can choose to do them in any order. Ideally, one packet per day is what is required, but they can choose to do at their pace as long as all are completed and returned to school in their provided folder when we return.

1. **Study Island Math** - they should have all the lessons in category 2, 3, and 5 completed. If not they need to finish any of those lessons. **DO NOT** do any of the lessons in category 4 (fractions) or category 6 (geometry). These are new concepts that we have not completely covered yet.
2. **Splash Math (Splash Learning)** - there are several lessons that have been assigned and added to their page that are concepts that have already been covered. They need to complete any of the lessons that have been assigned. Some of the students have been keeping up with these while given time in class, but some have not. Ideally they should try to complete 2 assignments daily.
3. **Mobymax Math** - there have been lessons assigned in Moby Max that are a review of taught concepts. They need to click on the assignment button which is a sheet of paper at the top when they sign in to find their assignments. Ideally they should complete 2 assignments daily.
4. **Aplus Math** is a great site where they can go and practice all of their fact fluency. They do not have to sign into this, they just need to do a search for **Aplus Math** in the search engine. This is a recommendation to use if they want to practice their math facts.
5. **XtraMath** - this is a website that they do have to sign into with a password. They can only do this once a day. They are practicing their facts right now on this website. They will just type in **XtraMath** in the search engine.
6. **Prodigy** - This a website we use for practice of concepts of skills in a fun way. The students may do this if they have all the other lessons or skills done for the day.

The students login codes for all online sites are on the back of this sheet.
